### SUMMARY

From the moment I first wrote "Hello World" on my first .js file I was hooked into software development. As time went by, what started as a simple console.log() ended up being something I became really passionate about and strive towards improving everyday. Below you'll find projects I've completed that showcase my skills and general background in developing software.

### SKILLS

#### Technical Skills

HTML - CSS - JavaScript - TypeScript - MongoDB - Express  
- React - VueJS - NodeJS - Pinia - Firebase - Git

#### Soft Skills

Organization - Time management

### WORK EXPERIENCE

**Software on the road, Rosario** — Full Stack Web Developer. 2022 - Present

Tech stack: *HTML, CSS, JavaScript, MongoDB, Express, VueJS, NodeJS, Pinia*

- Developed accessible, responsive and functional user interfaces with VueJS, HTML and CSS to allow visitors on any device to have the same perfect user experience.
- Translated designs and wireframes into high-quality code using HTML, CSS and JavaScript.
- Worked on and implemented APIs following RESTful standards to allow users to submit information by storing data in MongoDB or fetch data from it.
- Built mock designs for multiple web applications with the intent of saving time, allowing the team to effectively ensure reaching the MVP.

**Multiple health facilities, Rosario** — Intern of *Physical Therapy*. 2019 - 2022

- Collaborated with different health care physicians to ensure an interdisciplinary approach on each and every patient.
- Analyzed an assessed gait and posture of over 100 patients to gain insight over the origins of different types of biomechanical anomalies
- Organized and guided group sessions of physical therapy with over 15 people per group in a psychiatric hospital. Provided a safe space for patients to work together, build morale as well as relationships.

### PROJECTS

**Instagram Clone** — *HTML, CSS, JavaScript, React, Firebase*

- Designed and built a social media app where users can follow each other, post, like, save posts and comment.
- Firebase was introduced as a backend service to implement user authentication.
- Firestore Database was incorporated to store users and posts which were displayed to the user through an UI built with React and MaterialUI.
